

Best Practices for Assignment <2>: Local Variables in java

Summary of Learning:

- **Creating and defining Variables:** You learned how to create and defining variables in main method
- **Printing statements:** You learned how to use the `System.out.println()` method to print values of the variable to the console

Best Practices:

- **Commenting and Documentation:** Always include comments to describe the purpose of variable
- **Follow Naming Conventions:** Consistently use camelCase for variable names and PascalCase for class names.
- **Use proper indentation and formatting:** to make the code more readable.
